

## **Introduction: Distributed Control System (DCS)**

### **Seminar Title**

Introduction to Distributed Control System (DCS)

### **Seminar Date/ Venue**

17-21 April 2010

Qudaih Student Program, Qudaih

### **Seminar Duration**

Five Nights / 7:30 to 9:30 PM

### **Seminar Description**

The seminar covers hardware configuration, data communications, user interfaces and I/O devices. Also it covers the practical application of a control strategies.

### **Who Should Attend**

The seminar is intended for instrument/ control System engineers or personnel on technical position who wants to know more about DCS.

### **Seminar Fee**

SR 400. Per participant. This rate includes Participant's Pack (Folder, Manual, Hand-outs, etc.), daily refreshments (coffee/tea/beverages and snacks).

### **Seminar Outline**

- \* Basic Control Concept
- \* Introduction to Control System
- \* DCS Hardware & Software
- \* DCS Types
- \* Analogue Field communication
- \* Digital Field Communication
- \* Smart Measurement
- \* System Specification
- \* Overview of SCADA System
- \* Overview of Safety Instrument System

### **Clarification & Registration**
